

# Domestic Violence & Child Protection Training for Practitioners

## Safe Ireland Testimonial

*“Safe Ireland is clear that education and training is essential to the development of the DSGBV sector. It is necessary to build competency and excellence amongst workers and professionals, and it is of growing importance to enhance learning in the wider community. In light of the State’s new obligations under the Istanbul Convention, it is critical that Domestic Violence education is grounded in high-quality coherent content and accessible pathways, and in this regard Safe Ireland is delighted to have collaborated with Trinity College and MHC LLP on this new course.”*
