

# *Privacy & Data Security*

Privacy & Data Security law is a rapidly evolving area of increasing importance for companies, institutions and public bodies. Businesses striving to create value through intelligent analysis and use of data face a complex web of rules and regulations. The recent proposal for reform of the EU data protection regime, if passed into law, would represent a fundamental change in how businesses process personal data and a complete overhaul of the current data protection regime. With one of the largest teams of privacy lawyers in Ireland, we are well-positioned to advise on data securities matters.

Our Privacy & Data Security team provides world class expertise and strategic advice on all issues surrounding privacy law compliance, with a client base ranging from the world's best-known data driven companies to high-potential start-ups and government institutions. The firm offers clients unparalleled global expertise coupled with detailed local insight. We have extensive experience in multinational data projects, including contracts, audits, and policies.

*Dublin, London  
& New York*

## What others say about us...
