Why Ireland?

Ireland's 12.5% corporate tax rate, 25% R&D tax credit regime, tax amortisation of intellectual property and elaborate pooling system for foreign tax credits provide a unique OECD approved EU location for inward investment. Ireland's tax regime provides one component of the many non-fiscal attractions for foreign direct investment.

The Irish legislature and the Department of Finance, working alongside industry representatives including members of our tax practice, are at the forefront of both OECD and EU developments on international tax developments. We ensure that clients that locate to Ireland can develop their businesses in a manner that is not regarded in the current OECD BEPS (Base Erosion and Profit Shifting Environment) as abusive.
